****If teams are tied in Percentage, RANKING is determined by the following:***

FIRST, by the overall winner of "Head to Head" competition,

(the outcome of any regular season games the teams tied in record played against each other. If more than 2 Teams have the same Percentage, we take the 3 or more teams tied in Win-Loss and see what they're record is overall just with the games played among those teams. If that record is tied, we use the total "Run Differential").

Example: If Team #1, Team #3 & Team #5 have the same Win-Loss Percentage, We look at the following games:
1 vs 3, 1 vs 5, 3 vs 5...in any combination. Then the team with the best Win-Loss of those games has a higher ranking than the team with the 2nd best Win-Loss, etc. If those are all tied, we look at the scores in all the games Teams #1, #3 & #5 played against each other. If Team #1 beats Team #3 12-8, Team #1 has a Run Differential of +4 and Team #3 has a Run Differential of -4. This is used for every game among any of the more than 2 tied teams.

If Still Tied Then....

SECOND, by the "Run Differential" in the Scores of the games they played against each other.

If Still Tied Then....

THIRD, by the TOTAL Run Differential for All their played Regular Season games.
